### REPORT OF THE BOARD OF DIRECTORS, INDEPENDENT AUDITOR'S REPORT AND FINANCIAL STATEMENTS

**31 DECEMBER 2016** 

### **Board of Directors' Report**

On behalf of myself and the Board of Directors, I am pleased to address the Annual General Assembly of the shareholders' of Alubaf Arab International Bank B.S.C.(C) in Bahrain and present Alubaf's Annual Report and Audited Financial Statements for the financial year ended 31 December 2016.

The 2016 financial year was a challenging one for the banking industry as a whole, with diminishing economic growth both in the region and worldwide, which has impacted the quality of assets in these regions. Alubaf experienced an increase in non-performing assets in 2016, which required sizable provisioning during the aforementioned year.

As a result of provisioning for credit losses at US\$ 37.5 million, Alubaf recorded a net loss of US\$ 14.7 million for the financial year ended 31 December 2016, as opposed to a net profit of US\$ 25 million in 2015.

Interest and similar income for 2016 amounted to US\$ 39.6 million, compared with US\$ 47.6 million for 2015, signifying a reduction of 17%. On the other hand, interest expenses for 2016 stood at US\$ 8.6 million, signifying an increase of 184% compared to 2015. Thus, net interest income decreased by 30% in 2016 compared to 2015, mainly due to the increase in interest expenses.

Fee and commission income registered a sharp decline in 2016 to US\$ 5.6 million when compared to the US\$ 13.7 million achieved in 2015, which is a reduction of 59%. This reduction in fee and commission came consequent to the Bank's cautious strategy to avoid exposures to the high-risk markets which have caused losses to the Bank.

Gross operating income for 2016 was US\$ 38 million, as opposed to US\$ 59.3 million last year, signifying a decrease of 36%. In addition to decline in operating income, the Bank had lost a legal claim and paid a judgment sum amounting to US\$ 5.7 million in 2016, which is currently under appeal.

During 2016, the Bank created substantial provisioning for non-performing loans in line with the relevant regulatory requirements and standards, thus increasing the accumulated provision for loan losses to US\$ 69.5 million as at 31 December 2016, and ultimately increasing provision coverage ratio to 84% of these non-performing loans. Due to provisioning, net operating loss stood at US\$ 5.2 million for 2016, as compared with the previous year's net operating income of US\$ 37.7 million.

Total operating expenses were US\$ 9.5 million, as compared to last year's US\$ 12.6 million, which is a decrease of 25% resulting from significant saving on staff and other operating costs.

Total assets as at 31 December 2016 declined by 18% from last year. The capital adequacy ratio continued to be strong at 40% and the ratio of liquid assets to total assets was sustained at the same level of 64%.

As the results for 2016 registered a net loss, the Board of Directors have accordingly not recommended the payment of any dividends for the 2016 financial year.

Looking ahead, the growth prospects for 2017 continue to be challenging given the current global and regional market uncertainties. We reaffirm our strong commitment to meet the challenges by focusing on taking preemptive measures to address potential issues in advance in order to sustain consistent growth in the years ahead.

In conclusion, I would like to sincerely thank our shareholders, the Central Bank of Bahrain, the Ministry of Industry, Commerce and Tourism in the Kingdom of Bahrain, all our correspondent banks and our customers for their continued support and cooperation.

I also extend my appreciation and thanks to the members of the Board, Executive Management and all the employees for their efforts and commitment to the Bank's continued growth and progress.

Moraja G. YSolaiman Chairman

### INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ALUBAF ARAB INTERNATIONAL BANK B.S.C. (c)

### Report on the Audit of the Financial Statements

### Opinion

We have audited the accompanying financial statements of ALUBAF Arab International Bank B.S.C. (c) ("the Bank"), which comprise the statement of financial position as at 31 December 2016, and the statements of profit or loss, comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2016, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities* for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other information

Other information consists the Board of Directors' report, set out on pages 1 to 2 that was obtained at the date of this auditor's report. The Board of Directors is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ALUBAF ARAB INTERNATIONAL BANK B.S.C. (c)

Responsibilities of the Board of Directors for the Financial Statements (continued) In preparing the financial statements, the Board of Directors is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.

### INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ALUBAF ARAB INTERNATIONAL BANK B.S.C. (c)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

 Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### Report on Other Legal and Regulatory Requirements

As required by the Bahrain Commercial Companies Law and (Volume 1) of the Central Bank of Bahrain (CBB) Rule Book, we report that:

- a) the Bank has maintained proper accounting records and the financial statements are in agreement therewith;
- b) the financial information contained in the Report of the Board of Directors is consistent with the financial statements;
- c) we are not aware of any violations of the Bahrain Commercial Companies Law, the Central Bank of Bahrain and Financial Institutions Law, the CBB Rule Book (Volume 1 and applicable provisions of Volume 6) and CBB directives, regulations and associated resolutions or the terms of the Bank's memorandum and articles of association during the year ended 31 December 2016 that might have had a material adverse effect on the business of the Bank or on its financial position; and
- d) satisfactory explanations and information have been provided to us by Management in response to all our requests.

Partner's registration number. 115

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 1 ACTIVITIES

ALUBAF Arab International Bank B.S.C. (c) (the "Bank") is a closed Bahraini joint stock company incorporated in the Kingdom of Bahrain and registered with the Ministry of Industry, Commerce and Tourism under Commercial Registration (CR) number 12819. The Bank operates under a wholesale banking license issued by the Central Bank of Bahrain (the "CBB"). The Bank's registered office is at Building 854, Road 3618, Avenue 436, Alubaf Tower, Al-Seef District, PO Box 11529, Manama, Kingdom of Bahrain.

The Bank is majority owned by Libyan Foreign Bank, a bank registered in Libya (refer note 13 for more details).

The financial statements of the Bank for the year ended 31 December 2016 were authorised for issue in accordance with a resolution of the Board of Directors on 26 February 2017.

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

### 2.1 Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and are in conformity with the Bahrain Commercial Companies Law ("BCCL") the Central Bank of Bahrain ("CBB") and Financial Institutions Law, the CBB Rule Book (Volume 1 and applicable provisions of Volume 6) and the relevant CBB directives.

### Basis of measurement

The financial statements have been prepared on a historical cost basis, except for derivative financial instruments, trading investments and available-for-sale (AFS) financial assets that have been remeasured at fair value.

### Functional and presentation currency

The financial statements are presented in United States Dollars (US\$), being the Bank's functional currency. All values are rounded to the nearest thousand (US\$ '000), except when otherwise indicated.

### 2.2 Significant accounting policies

### Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### Financial assets and financial liabilities

Financial assets of the Bank comprise cash and balances with banks, deposits with banks and other financial institutions, investments held for trading, non-trading investments, loans and advances, interest receivable and other assets. Financial liabilities of the Bank comprise deposits from banks and other financial institutions, due to banks and other financial institutions, due to customers, interest payable and other liabilities.

The specific accounting policies relating to various financial assets and liabilities are set out below:

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Financial assets and financial liabilities (continued)

### i) Financial assets

### Initial recognition and measurement

Financial assets are classified, at initial recognition, as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available for sale financial assets, or as derivative instruments, as appropriate. All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Bank commits to purchase or sell the asset.

### Subsequent measurement

For purposes of subsequent measurement financial assets are classified in four categories:

- · At fair value through profit or loss
- Loans and receivables
- Held-to-maturity
- Available-for-sale

### a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. These are subsequently measured at fair value with any realised and unrealised gains and losses arising from changes in fair values being included in the statement of profit or loss in the period in which they arise. Interest earned and dividends received in respect of financial assets at fair value through profit or loss are included in 'interest and similar income' and 'dividend income' respectively.

### b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in 'interest and similar income' in the statement of profit or loss. The losses arising from impairment of loans and receivables are recognised in the statement of profit or loss.

### c) Held-to-maturity

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the Bank has the positive intention and ability to hold them to maturity. After initial measurement, held-to-maturity financial assets are measured at amortised cost using the EIR, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as 'interest and similar income' in the statement of profit or loss. The losses arising from impairment are recognised in the statement of profit or loss.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Financial assets and financial liabilities (continued)

### i) Financial assets (continued)

### d) Available-for-sale

Available-for-sale financial assets include equity investments and debt securities. Equity investments classified as available-for-sale are those that are neither classified as held for trading nor designated at fair value through profit or loss. Debt securities in this category are those that are intended to be held for an indefinite period of time and that may be sold in response to needs for liquidity or in response to changes in the market conditions.

After initial measurement, available-for-sale financial assets are subsequently measured at fair value with unrealised gains or losses recognised in other comprehensive income and credited in the fair value reserve until the investment is derecognised, at which time the cumulative gain or loss is recognised in other operating income, or the investment is determined to be impaired, when the cumulative loss is reclassified from the fair value reserve to the statement of profit or loss.

The Bank evaluates whether the ability and intention to sell its available-for-sale financial assets in the near term is still appropriate. When, in rare circumstances, the Bank is unable to trade these financial assets due to inactive markets, the Bank may elect to reclassify these financial assets if the management has the ability and intention to hold the assets for foreseeable future or until maturity.

For a financial asset reclassified from the available-for-sale category, the carrying amount at the date of reclassification becomes its new amortised cost and any previous gain or loss on the asset that has been recognised in equity is amortised to profit or loss over the remaining life of the investment using the EIR. Any difference between the new amortised cost and the maturity amount is also amortised over the remaining life of the asset using the EIR. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to the statement of profit or loss.

### Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Bank's statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Bank has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Bank has transferred substantially all the risks and rewards of the asset, or (b) the Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Bank continues to recognise the transferred asset to the extent of the Bank's continuing involvement. In that case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### i) Financial assets (continued)

### Impairment of financial assets

The Bank assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment loss exists if one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event'), has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

The impairment assessment of different categories of financial assets are discussed below:

### a) Financial assets carried at amortised cost

For financial assets carried at amortised cost, the Bank first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in the statement of profit or loss. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Financial assets carried at amortised cost, together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Bank. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited in the statement of profit or loss.

### b) Available-for-sale

For available-for-sale financial assets, the Bank assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

In the case of equity investments classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. When there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss – is removed from other comprehensive income and recognised in the statement of profit or loss. Impairment losses on equity investments are not reversed through profit or loss; increases in their fair value after impairment are recognised in other comprehensive income.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### i) Financial assets (continued)

### Impairment of financial assets (continued)

### b) Available-for-sale (continued)

The determination of what is 'significant' or 'prolonged' requires judgement. In making this judgement, the Bank evaluates, among other factors, the duration or extent to which the fair value of an investment is less than its cost.

In the case of debt instruments classified as available-for-sale, the impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss.

Future interest income continues to be accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the statement of profit or loss, the impairment loss is reversed through the statement of profit or loss.

### ii) Financial liabilities

All financial liabilities are recognised initially at fair value.

### Subsequent measurement

After initial recognition, financial liabilities are subsequently measured at amortised cost using the EIR method.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

### Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

### iii) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

### **Derivative financial instruments**

The Bank makes use of derivative instruments, such as forward foreign exchange contracts.

Derivatives are initially recognised, and subsequently measured, at fair value with transaction costs taken directly to the statement of profit or loss. The fair value of a derivative is the equivalent of the unrealised gain or loss from marking to market the derivative. Derivatives with positive fair values (unrealised gains) are included in other assets and derivatives with negative fair values (unrealised losses) are included in other liabilities in the statement of financial position.

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash and balances with banks, treasury bills and deposits with banks and other financial institutions with original maturities of 90 days or less.

### Property, equipment and software

Property, equipment and software are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Expenditure incurred to replace a component of an item of property, equipment and software that is accounted for separately is capitalised and the carrying amount of the component that is replaced is written off. When significant parts of property, equipment and software are required to be replaced at intervals, the Bank depreciates them separately based on their specific useful lives. Land and capital work in progress are not depreciated. Repairs and maintenance costs are recognised in the statement of profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, as follows:

Assets	Estimated useful life in years
Building	15
Furniture, equipment and vehicles	3 to 5
Software	3 to 5

An item of property and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, equipment and software are reviewed at each financial year end and adjusted prospectively, if appropriate.

### Impairment of non-financial assets

The Bank assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount, with the difference being recognised as an impairment in the statement of profit or loss.

### Renegotiated loans

In the ordinary course of its business, the Bank seeks to restructure loans. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original effective interest rate as calculated before the modification of terms and the loan is no longer considered past due. Management continually reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original effective interest rate.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Financial guarantees

In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit and guarantees.

Financial guarantees are initially recognised in the financial statements at fair value, being the commission received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the un-amortised commission and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

### **Provisions**

Provisions are recognised when the Bank has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised in the statement of profit or loss.

### Employees' end of service benefits

The Bank provides end of service benefits to its non - Bahraini employees. The entitlement to these benefits is based upon the employee's final salary and length of service. The expected costs of these benefits are accrued over the period of employment. The Bank also makes contributions to the Social Insurance Organisation (SIO) Scheme calculated as a percentage of the employees' salaries. The Bank's obligations are limited to these contributions, which are expensed when due.

### **Contingent liabilities**

Contingent liabilities are not recognised in the financial statements, but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

### Share capital, statutory reserve and dividend

### Share capital

Ordinary shares issued by the Bank are classified as equity. The Bank classifies capital instruments as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

### Statutory reserve

The Bahrain Commercial Companies Law requires that 10% of the annual profit be appropriated to a statutory reserve which is normally distributable only on dissolution. Appropriations may cease when the reserve reaches 50% of the paid up share capital.

### Dividend

The Bank recognises a liability to make cash or non-cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Bank. As per the Bahrain Commercial Companies Law, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

### Fair value measurement

The Bank measures financial instruments, such as investments and derivatives at fair value at the date of statement of financial position. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are disclosed in note 22.5.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Fair value measurement (continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- · In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Bank.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Bank has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

### Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment. The following specific recognition criteria must also be met before revenue is recognised:

### Interest income

For all financial instruments measured at amortised cost and interest-bearing financial assets classified as available-for-sale, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability. The recognition of interest income is suspended when the loans become impaired, such as when overdue by more than 90 days.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.2 Significant accounting policies (continued)

### Revenue recognition (continued)

Fee and commission income

Fee and commission income are recognised when earned.

### Dividend income

Dividend income is recognised when the Bank's right to receive the payment is established, which is generally when shareholders approve the dividend.

### Share based payments

### Cash-settled share based payments

The cost of cash-settled share based payment transactions is measured initially at fair value at the grant date using an appropriate valuation model. This fair value is expensed over the period until the vesting date with recognition of a corresponding liability. The liability is remeasured to fair value at each reporting date up to, and including the settlement date, with changes in fair value recognised in the statement of income.

### Foreign currencies

The Bank's financial statements are presented in United States Dollars (US\$), which is the Bank's functional currency.

Transactions in foreign currencies are initially recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in other comprehensive income (OCI) or profit or loss are recognised in OCI or profit or loss, respectively).

### 2.3 Changes in accounting policies and disclosures

### i) New and amended standards and interpretations

The below new standards and amendments apply for the first time for annual periods beginning on or after 1 January 2016. However, they did not impact the annual financial statements of the Bank.

Amendments to IAS 16 and IAS 38: Clarification of Acceptable Methods of Depreciation and Amortisation. The amendments clarify the principle in IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is a part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortise intangible assets. The amendments are applied prospectively and do not have any impact on the Bank, given that it has not used a revenue-based method to depreciate its non-current assets.

### Amendments to IAS 27: Equity Method in Separate Financial Statements

The amendments allow entities to use the equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities already applying IFRS and electing to change to the equity method in their separate financial statements have to apply that change retrospectively. These amendments do not have any impact on the Bank's consolidated financial statements.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.3 Changes in accounting policies and disclosures (continued)

### i) New and amended standards and interpretations (continued)

Annual Improvements 2012-2014 Cycle

These improvements include:

### IFRS 7 Financial Instruments: Disclosures

The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and the arrangement against the guidance for continuing involvement in IFRS 7 in order to assess whether the disclosures are required. The assessment of which servicing contracts constitute continuing involvement must be done retrospectively. However, the required disclosures need not be provided for any period beginning before the annual period in which the entity first applies the amendments.

### IAS 19 Employee Benefits

The amendment clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used. This amendment is applied prospectively.

### Amendments to IAS 1 Disclosure Initiative

The amendments to IAS 1 clarify, rather than significantly change, existing IAS 1 requirements. The amendments clarify:

- The materiality requirements in IAS 1;
- That specific line items in the statement(s) of profit or loss and other comprehensive income "OCI" and the statement of financial position may be disaggregated;
- That entities have flexibility as to the order in which they present the notes to financial statements;
   and
- That the share of OCI of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss.

Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the statement of financial position and the statement(s) of profit or loss and OCI.

### ii) Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. This listing is of standards and interpretations issued, which the Bank reasonably expect to be applicable at a future date. The Bank intends to adopt these standards, if applicable, when they become effective.

### IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments that replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. IFRS 9 brings together all three aspects of the accounting for financial instruments project: classification and measurement, impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Except for hedge accounting, retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

### 2.3 Changes in accounting policies and disclosures (continued)

### IFRS 9 Financial Instruments (continued)

The Bank plans to adopt the new standard on the required effective date. During 2016, the Bank performed a high-level impact assessment of all three aspects of IFRS 9 as required by the Central Bank of Bahrain.

### IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after 1 January 2018, when the IASB finalises their amendments to defer the effective date of IFRS 15 by one year. Early adoption is permitted. The Bank plans to adopt the new standard on the required effective date using the full retrospective method.

### IFRS 16 Leases

The IASB issued the new standard for accounting for leases - IFRS 16 Leases in January 2016. The new standard does not significantly change the accounting for leases for lessors. However, it does require lessees to recognise most leases on their statement of financial position as lease liabilities, with the corresponding right-of- use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise 'short-term' leases and leases of 'low-value' assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to today's finance lease accounting, with interest and depreciation expense recognised separately in the statement of profit or loss.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted provided the new revenue standard, IFRS 15, is applied on the same date. Lessees must adopt IFRS 16 using either a full retrospective or a modified retrospective approach. The Bank does not anticipate early adopting IFRS 16 and is currently evaluating its impact.

### Amendments to IAS 7: Statement of Cash Flows

In January 2016, the IASB issued amendments to IAS 7 Statement of Cash Flows with the intention to improve disclosures of financing activities and help users to better understand the reporting entities' liquidity positions. Under the new requirements, entities will need to disclose changes in their financial liabilities as a result of financing activities such as changes from cash flows and non-cash items (e.g., gains and losses due to foreign currency movements). The amendment is effective from 1 January 2017. The Bank is currently evaluating the impact.

### 3 SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Bank's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Bank's accounting policies, management has made the following judgments, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

As at 31 December 2016

### 3 SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

### Goina concern

The Bank's Board of Directors has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, the Board of Directors are not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

### Impairment and uncollectability of financial assets

Financial assets not carried at fair value are reviewed at each statement of financial position date to determine whether there is objective evidence that a specific financial asset may be impaired. If such evidence exists, any impairment loss is recognised in the statement of profit or loss. For assets carried at amortised cost, impairment is based on estimated future cash flows discounted at the original effective interest rate.

### Classification of investments

Management decides on acquisition of a financial asset whether it should be classified as "fair value through profit or loss", "available-for-sale" or "held to maturity". The classification of each investment reflects management's intention in relation to each investment and is subject to different accounting treatments based on such classification.

### 4 CASH AND BALANCES WITH CENTRAL BANK AND OTHER BANKS

### 8 LOANS AND ADVANCES (continued)

### Reclassification of financial assets

In October 2008, the IASB issued amendments to IAS 39 "Financial Instruments: Recognition and Measurement" and IFRS 7 "Financial Instruments: Disclosures" titled "Reclassification of Financial Assets". The amendments to IAS 39 permit reclassification of financial assets from the "trading investment" category to "loans and advances" category in certain circumstances.

The amendments to IFRS 7 introduce additional disclosure requirements if an entity has reclassified financial assets in accordance with the IAS 39 amendments. The amendments are effective retrospectively from 1 July 2008.

In accordance with the amendments to IAS 39 and IFRS 7, "Reclassification of Financial Assets" the Bank reclassified investments in Iraq Notes with a carrying value of US \$ 40.2 million, effective 1 July 2008 from 'trading investment' to 'loans and advances' pursuant to the amendment to IAS 39 and IFRS 7 issued by IASB in October 2008 and considering the global financial crisis as a rare circumstance in the financial sector.

The carrying values and fair values of the assets reclassified are as follows:

	US\$ '000	US\$ '000
Carrying value	44,615	43,899
Fair value	45,642	37,215

Additional fair value gain that would have been recognised in the statement of profit or loss for the year ended 31 December 2016 had the trading investment not been reclassified amounts to US\$ 1,027 thousand (2015: loss of US\$ 6,684 thousand).

The Bank earns an effective interest rate of 8.89% (2015: 8.89%) and expects to recover US \$ 44,615 thousand (2015: US \$ 43,899 thousand) on this reclassified financial asset.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 10 DEPOSITS FROM AND DUE TO BANKS AND OTHER FINANCIAL INSTITUTIONS

### 10.1 Deposits from banks and other financial institutions

Deposits from banks and other financial institutions represent interest bearing money market deposits held with the Bank as at the statement of financial position date.

### 10.2 Due to banks and other financial institutions

Due to banks and other financial institutions comprise the following current account balances and cash collateral held with the Bank in relation to the letters of credit and letters of guarantee issued as at the statement of financial position date:

	2016 US <b>\$ '000</b>	2015 US\$ '000
Current account balances Cash collateral held	72,940 83,375	104,116 98,243
	156,315	202,359

### 11 DUE TO CUSTOMERS

Due to customers represent current account balances and cash collateral of corporate customers held with the Bank in relation to the letters of credit and letters of guarantee as at the statement of financial position date.

	2016	2015
	US\$ '000	US\$ '000
Current account balances	76,974	23,406
Cash collateral held	52,781	8,166

Unearned fee income	378	517
Negative fair value of derivatives - net (note 23)	-	563
Others	523	181
	4,784	7,603

Accrued expenses include US\$ 545 thousand (2015: US\$ 484 thousand) of liability relating to cash settled share based payments.

The Bank has established an Employee Phantom Share Scheme (EPSS) in compliance with the sound remuneration rules issued by the Central Bank of Bahrain. Under the scheme, certain eligible employees of the Bank become entitled to share based compensation. Under the EPSS, each eligible employee is issued with a phantom share award which entitles the holder to receive one phantom share at the delivery date. The share awards will vest over 3 years with one third award vesting at the end of the subsequent 3 years. The eligible employee has to retain the shares for a period of 6 months post the award date prior to encashing the vested awards. Phantom units are ultimately cash settled based on the audited net book value of the Bank at the vesting dates.

As at 31 December 2016

### 12 OTHER LIABILITIES (continued)

The cost of the phantom units are initially measured at net-book-value per share of the Bank at the grant date and expensed in the statement of income with a corresponding liability being recognised. The liability is remeasured to its net-book-value per share of the Bank at each reporting date up to the date of settlement with changes in fair value recognised in the statement of profit or loss.

### Statutory reserve

As required by the Bahrain Commercial Companies Law and the Bank's articles of association, a statutory reserve has been created by transfer of 10% of its annual profit. The Bank may resolve to discontinue such transfers when the reserve totals 50% of the paid up capital. The reserve is not distributable except in such circumstances as stipulated in the BCCL and following approval of the Central Bank of Bahrain. No transfer has been made during the year as the Bank incurred loss for the year ended 31 December 2016. During the year ended 31 December 2015 US\$ 2,507 thousand was transferred.

### 14 DIVIDENDS PAID AND PROPOSED

No dividend for the year ended 31 December 2016 is proposed (2015: US\$ 12.5 million; US\$ 2.50 per share).

During the year, the dividend for the year ended 31 December 2015 amounting to US\$ 12.5 million (US\$ 2.50 per share) was paid following regulatory approvals and the approval of the shareholders in the Annual General Meeting held on 19 April 2016 (the dividend for the year ended 31 December 2014 amounting to US\$ 25 million i.e. US\$ 5 per share was paid during 2015).

### 20 SETTLEMENT OF LEGAL CLAIM

The Bank was defendant in legal proceedings where the counterparty was pursuing a claim based on a document, which management believed, did not commit the Bank. On 30 June 2016, a judgement was issued by the relevant Court that required the Bank to pay compensation of US\$ 5,737 thousand to the claimant. In August 2016, the Bank paid the compensation into a separate escrow account to be paid to the claimant, which has been expensed in the statement of profit or loss for the year ended 31 December 2016. The Bank has also requested permission to appeal.

As at 31 December 2016

### 21 COMMITMENTS AND CONTINGENT LIABILITIES

	2016	2015
	US\$ '000	US\$ '000
Credit related contingencies		
Letters of credit	57,947	150,677
Letters of guarantee	13,199	14,079

Other	81,751	199,373
Forward foreign exchange contracts (note 23)	1,875	147,524
	83,626	346,897

All undrawn loan commitments are maturing within one year from 31 December 2016 and 31 December 2015 respectively.

### 22 RISK MANAGEMENT

### 22.1 Introduction

Risk is inherent in the Bank's activities and is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The main risks to which the Bank is exposed are credit risk, liquidity risk, market risk and operational risk.

### a) Risk management structure

### **Board of Directors**

The Board of Directors is responsible for the overall risk management approach and for approving the risk strategies and principles.

### Audit Risk and Compliance Committee

The Audit Risk and Compliance Committee (ARCC) of the Board is responsible for assessing the quality and integrity of financial reporting, effectiveness of systems monitoring financial and disclosure compliance with legal and regulatory requirements, supervision of compliance function and soundness of internal controls. The ARCC also obtains regular updates from management and the Bank's compliance officer regarding compliance matters, which may have a material impact on the Bank's financial statements and reviews the findings of any examinations by regulatory agencies.

### Management Risk Committee

The Management Risk Committee has the overall responsibility for establishing the risk strategy and implementing principles, frameworks, policies and limits. It is responsible for the fundamental risk issues and manages and monitors relevant risk decisions.

### Asset Liability Management Committee

The Asset Liability Management Committee's (ALCO) objective is to prudently direct and manage asset and liability allocation to achieve the Bank's strategic goals. The ALCO monitors the Bank's liquidity risks by ensuring that the Bank's activities are in line with the risk/reward guidelines approved by the Board.

### Internal Audit

Internal control processes throughout the Bank are audited at least annually by the Internal Audit Department, based on the risk-based audit plan approved by the ARCC. Internal audit staff examine both the adequacy of the procedures and the Bank's compliance with the procedures. Internal Audit discusses the results of all assessments with management and reports its findings and recommendations to the

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 22 RISK MANAGEMENT (continued)

### 22.1 Introduction (continued)

### b) Risk measurement and reporting systems

Monitoring and controlling risks is primarily performed based on limits approved by the Board. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that it is willing to accept, with additional emphasis on selected industries. The Bank also monitors and measures the overall risk-bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

### c) Credit concentration risk

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

In order to manage credit concentration risk, the Bank's policies and procedures include guidelines to maintain a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.

### 22.2 Credit risk

Credit risk is the risk that a customer or counterparty will fail to meet a commitment, resulting in financial loss to the Bank. Such risk arises from lending, treasury and other activities undertaken by the Bank. Credit risk is actively monitored in accordance with the credit policies which clearly define delegated lending authorities, and procedures. The Bank manages its credit risk by monitoring concentration of exposures by geographic location and adhering to approved limits. The Bank limits its risk on off balance sheet items with adequate collateral.

### a. Maximum exposure to credit risk without taking account of any collateral and other credit enhancements

The table below shows the maximum exposure to credit risk for the components of the statement of financial position. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral agreements. The net exposure represents gross exposure net of cash collateral against letters of credit.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 22 RISK MANAGEMENT (continued)

### 22.2 Credit risk (continued)

The amount, type and valuation of collateral are based on guidelines specified in the risk management framework. The main types of collaterals accepted include cash collateral, residential and commercial real estate and securities.

### b. Credit quality per class of financial assets

The table below presents an analysis of the financial assets exposed to credit risk and external rating designation at 31 December 2016 and 31 December 2015. The credit quality is graded based on external credit rating agencies - Standard & Poor, Fitch and Moody's and internal ratings are categorised as follows:

- (i) High standard Where external credit rating agency ratings are A and above
- (ii) Standard Where external credit rating agency ratings are below A and unrated.
- (iii) Watch list Where the facility is not past due but recoverability is being monitored.
- (iv) Past due and impaired Where interest or principal sum of loan is due for more than 90 days.

### 22.3 Market risk

Market risk is the risk of potential financial loss that may arise from adverse changes in the value of a financial instrument or portfolio of financial instruments due to movements in interest rates, foreign exchange rates and equity prices. This risk arises from asset - liability mismatches, changes that occur in the yield curve and foreign exchange rates.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 22 RISK MANAGEMENT (continued)

### 22.3 Market risk (continued)

### 22.3.1 Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect the value of financial instruments. The Bank is exposed to interest rate risk as a result of mismatches or gaps in the amounts of assets and liabilities that mature or reprice in a given period. The Bank manages this risk by matching the repricing of assets and liabilities through a number of means. The Bank's interest rate sensitivity position as of 31 December, is as follows:

### Sensitivity analysis - interest rate risk

	Impact on sta profit o	
	2016	2015
25 bps increase/decrease	US\$ '000	US\$ '000
US Dollar	± 1,307	± 161
Euro	± 37	± 764

### 22.3.2 Currency risk

Currency risk arise from the movement of the rate of exchange over a period of time. The Bank's currency risk is limited to assets and liabilities denominated in GBP and Euro. The following table demonstrates the sensitivity to a reasonable possible change in foreign exchange rates, with all other variables held constant, on the Bank's statement of profit or loss:

Change in rate	Effect on sta profit or loss	
·	2016 US\$ '000	2015 US\$ '000
± 5%	± 216	± 7,351
± 5%	± 3	± 4

As other currency exposures are insignificant and GCC currencies to which the Bank is exposed are pegged to the US Dollar, their balances are not considered to represent significant currency risk.

### 22.3.3 Equity price risk

Equity price risk is the risk that the fair value of equities decreases as a result of changes in the value of individual companies' shares. The effect on profit and equity, as a result of a change in fair value of trading equity instruments, due to a reasonably possible change in equity prices, with all other variables held constant, is as follows:

	Change in equity prices	Effect on net in equity for t	
		2016 US\$ '000	2015 US\$ '000
Investments held for trading	± 10%	± 21	± 2

### 22.4 Liquidity risk

Liquidity risk is the risk that the Bank will be unable to meet its funding requirements. Liquidity risk can be caused by market disruptions or a credit downgrade which may cause certain sources of funding to dry up immediately. To limit this risk, management has arranged diversified funding sources, manages assets with liquidity in mind, and monitors liquidity on a daily basis. This incorporates an assessment of expected cash flow and the availability of high grade collateral which would be used to secure additional funding if required.

As at 31 December 2016

### RISK MANAGEMENT (continued) 22

### Liquidity risk (continued)

The maturity profile of the assets and liabilities at 31 December 2016 given below reflects the management's best estimates of the maturities of assets and liabilities that have been determined on the basis of the remaining period at the date of the statement of financial position.

<sup>-</sup> Except for Level 3 classified held-to-maturity investments, fair values of held-to-maturity investments and loans are determined based on quoted prices in active markets.

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

### 22 RISK MANAGEMENT (continued)

### 22.5 Fair value of financial instruments (continued)

Balances with banks, deposits with banks and other financial institutions, loans and advances (other than those disclosed in the table above), interest receivable, other assets, deposits from banks and other financial institutions, due to banks and other financial institutions, due to customers, interest payable and other liabilities are generally short term in nature. Management has assessed that the fair values of these approximate their carrying values as of 31 December 2016 and 31 December 2015.

### 23 DERIVATIVE FINANCIAL INSTRUMENTS

In the ordinary course of business, the Bank enters into various types of transactions that involve derivative financial instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in price in one or more underlying financial instruments, reference rates or indices.

These include forward exchange contracts which create rights and obligation that have the effect of transferring between the parties of the instrument one or more of the financial risks inherent in an underlying primary financial instrument. On inception, a derivative financial instrument gives one party a contractual right to exchange financial assets or financial liabilities with another party under conditions that are potentially favourable, or a contractual obligation to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable. However, they generally do not result in a transfer of the underlying primary financial instrument on inception of the contract, nor does such a transfer necessarily take place on maturity of the contract. Some instruments embody both a right and an obligation to make an exchange. Because the terms of the exchange are determined on inception of the derivative instruments, as prices in financial markets change those terms may become either favourable or unfavourable.

The table below shows the net fair values of derivative financial instruments together with the notional amount. These contracts are settled on a net basis. Depending on currency movements, the contracts may result in either a net asset or a net liability. The following table shows the material outstanding contracts as at 31 December:

	201	6	201	5
	Notional amount US\$ '000	Gain / (loss) US\$ '000	Notional amount US\$ '000	Gain / (loss) US\$ '000
Forward foreign exchange contracts	1,875	16	147,524	(563)

### NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2016

# 24 RELATED PARTY BALANCES AND TRANSACTIONS

### 24 TRANSACTIONS WITH RELATED PARTIES (continued)

### Compensation paid to the Board of Directors and key management personnel:

	2016	2015
	US\$ 000	US\$ 000
Short term benefits	2,204	3,963
End of term benefits	158	314
Cash settled share based payments	-	270
Total compensation	2,362	4,547

Short term benefits include Board of Directors' sitting fees of US\$ 144 thousand (2015: US\$ 786 thousand) and reimbursement of travel, accommodation and other expenses amounting to US\$ 127 thousand (2015: US\$ 175 thousand). The accrual is subject to approval by the Bank's shareholders in the next Annual General Meeting.

Short term benefits also include compensation paid to key management personnel as salary and allowances.

### 25 ASSETS UNDER MANAGEMENT

The Bank provides trade finance services to certain customers on behalf of its Parent, which involve the Bank acting as the custodian of the assets in a fiduciary capacity. Assets that are held in financing capacity are not included in these financial statements. At 31 December 2016, the Bank had fiduciary assets under management of US\$ 30,564 thousand (2015:US\$ 21,005 thousand).

### **26 CAPITAL ADEQUACY**

The primary objectives of the Bank's capital management are to ensure that the Bank complies with externally imposed capital requirements and the Bank maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholders' value.

In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities.

The risk asset ratio, calculated in accordance with the capital adequacy guidelines, under Basel III, approved by the Central Bank of Bahrain is as follows:

	2016 US\$ 000	2015 US\$ 000
Capital base: Tier 1 capital Tier 2 capital	301,849 3,500	329,611 3,765
Total capital base (a)	305,349	333,376
Risk weighted assets (b)	766,464	753,148
Capital adequacy (a/b * 100)	39.84%	44.26%
Minimum requirement	12.00%	12.00%
