Leverage and Liquidity Disclosures

30 June 2025

Alubaf Arab International Bank B.S.C (c)

As at 30 June 2025

Liquidity Coverage Ratio

The Group is subject to the Basel III liquidity ratios requirement, as stipulated by the regulator Central Bank of Bahrain, whereby the Bank is required to maintain a minimum of 100% Liquidity Coverage ratio (LCR) and Net Stable Funding ratio (NSFR).

The main objective of the Liquidity Coverage Ratio (LCR) is to promote the short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient level of high-quality liquid assets (HQLA) to survive a significant stress scenario lasting for a period of up to 30 days.

At 30 June 2025, the Group's LCR was well above the regulatory requirement and stood at 864% (31 December 2024: 408%). The Group's simple average of daily LCR computed on working days of the quarter was 745% (31 March 2025: 607%).

Net Stable Funding Ratio

The Group is subject to the Basel III liquidity ratios requirement, as stipulated by the regulator Central Bank of Bahrain, whereby the Bank is required to maintain a minimum of 100% Net Stable Funding ratio (NSFR).

The objective of the NSFR is to promote the resilience of the banking system by improving the funding profile of banks by ensuring they have a sufficient level of stable funding from stable sources and long term borrowing in relation to their assets and commitments, in order to reduce the risks of disruptions which might impact the bank's liquidity position.

The Groups NSFR was well above the regulatory requirement and stood at 153% as at 30 June 2025 (31 December 2024: 178%). The main drivers for robust Available Stable Funding (ASF) is its sizeable capital base, which contributes about 69% (31 December 2024: 55%) of total ASF and the remaining 31% (31 December 2024: 45%) of ASF constituted funding from deposits from financial institutions and non-financial corporate customers. Required Stable Funding (RSF), primarily comprised of short term deposit placements with Banks and other performing loans, which constituted about 45% (31 December 2024: 48%) of total RSF. High quality liquid assets (that comprised mainly of Bahrain government securities and other highly rated debt issuances) accounted for about 12% (31 December 2024: 11%) of the total RSF, while non-HQLA securities accounted for 27% (31 December 2024: 25%) of the total RSF.
